LUXIONA

Our values

European design, customised solutions and competitive edge

Created in Barcelona, Spain, and developed in Poland, our products combine European design with high quality and efficiency. At the very centre of our work is our passion for lighting and functional design. The superior performance aligned with aesthetics and simplicity of installation and maintenance

makes it a perfect solution for any space. Thanks to a variety of customisable options, it is possible to adjust our products to the needs of a specific project, including all kinds of spaces in retail facilities and offices, as well as architectural, public, outdoor, medical, and industrial spaces.

Design

Designed in Barcelona

From the moment we started our company in Barcelona in 1929, the value of design has been part of LUXIONA's soul. Since the invention of the first electrified track system inspired by the trolleybuses on the streets of Barcelona, the source of inspiration for our products is based on this city that exudes design, art, and the avant-garde. We have an international presence

with offices in Spain, France, Italy, Germany, and Poland, but it is here in Barcelona where the research and product development team is located to keep the initial spirit alive in each of our luminaires, always at the cutting edge of sustainable technologies. The result is lighting solutions that offer a comfortable visual experience, which enhances your well-being while respecting the environment.

DESIGN PLUS

Competitive manufacturing

By combining design in Barcelona with production in Europe, LUXIONA provides customers with competitive, flexible, and timely solutions. With a certified manufacturing facility for clean-room and medical lighting and a logistics center located in Poland, we can be independent and offer fast turnaround times, as well as better communication and advice. Our infrastructure and technical equipment are constantly updated to offer continuous improvement of production.

With our on-site certified clean room, we are one of the few manufacturers in Europe to fully control of the production process, while maintaining the necessary standards to certify our luminaires for installations requiring a high degree of air cleanliness, including the ISO 14644-1 certification for clean rooms. As a result, our product range has applications in: architectural, office, industrial, sports, retail, clean rooms, medical and hospital facilities, as well as the pharmaceutical, chemical, food, and electronics industries.

Certificate ISO 14001:2015

Certificate ISO 9001:2015

Certificate HACCP

Certificate ISO 13485:2016

Lighting Consulting

Our team of 50+ experts is always available in each country of our presence and will support you in your lighting projects. We provide personalised, advice specific to office spaces, based on experience and the know-how we have gained throughout the years. By fully monitoring your project through to implementation, we offer you a global and integral vision at every stage. A personal approach to every client is at the centre of our work and leads to a partnerships that result in top-quality projects.

Customer and project requirements

Stage 1: Plan including (suggestions for) the placement of luminaires. Detailed plans with sections, cuts, ceiling types, and furnishings. Functions, branding, ambience, experience, sensations, levels, and creation of environments. BIM methodology.

Lighting consulting, conceptualisation and development of the project Analysis and review of your plans and needs

Stage 2: Concept sketch of the lighting design. Plans with recommended placement of luminaires. Lighting design and calculations (3D modelling). Calculations to adjust and approve the (final) lighting design and the lighting levels, sensations, consumption control, and efficiency. Development of special projects and products.

Presentation and delivery of the project

Stage 3: Lighting levels represented in false colours. Luminaire placement plan (PDF and CAD). Technical data sheets of the applied products. Control and Smart Lighting services: Creation of groups and scenes, location of sensors, sketches and electrical diagrams, configuration, etc.

Technical support and customer service

Stage 4: The final lighting simulation project. Follow-up and supervision of installation and configurations. Incident management. Maintenance and repairs. Programming and commissioning of regulation and control systems.

Sustainable solutions

Sustainability is at the very core of our values. By working together we strive to develop projects that have a positive impact on the environment and promote a more sustainable lighting industry. We are able to achieve this by putting the control of the lighting in the hands of the user by using intelligent switching control systems and by providing users with efficient, and sustainable solutions.

One of them are LED sources used in LUXIONA luminaires, characterised by a long lifespan of 100,000 h and the LxBy parameter at the L80B10 level. This means that after 100,000 hours of use, the LED sources will retain 80% of their initial luminous flux, and only 10% of the LEDs will have less than 80% of their initial luminous flux. This means that we can enjoy their quality longer.

Innovative technology

Innovations and functionality have always been and will remain an important factor in the development of new lighting solutions, services, and the application of new technologies. The know-how accumulated after almost half a century of experience and the combination of design and engineering allows us to stay one step ahead.

Together with our R+D+i department, in constant search for new lighting solutions, we are able to use the latest generation of materials and production processes. Looking to the future combined with our experience allow us to shape the lighting of the future and expand our innovative product portfolio.

Certification programmes for green buildings

Customise and go beyond the standards

We leave nothing to chance. By listening, understanding, and combining our knowledge and experience we make the most of available possibilities. By anticipating the expectations of architects, lighting designers, interior designers, and engineers we create lighting solutions that respond to their needs.

Tailor-made lighting is the most effective way to address specific design challenges. From modern receptions, office rooms, coworking areas, meeting points and chill zones to big open spaces and conference rooms customizable lighting provides effective solutions and provides an inspiring, one-of-a-kind aesthetic. As a lighting manufacturer with an R&D department and modern technological facilities, we are creating non-standard solutions by modifying all parts of our luminaires: light, gear, and luminaire body. The result? Artisanal, made-to-measure solutions that fit settings intimate or expansive, functional or multipurpose.

Tuset Sound Absorbent **N** **A**

Light

Colour temperature

From warm to cool, reproduces the sunlight tone during the day. Customised to create different atmospheres.

Colour rendering

Artificial light property to reproduce the real colours of an object. Key when product appearance is a must.

Lumen

Amount of visual light emitted.

Diffuser

Part of the luminaire with light and mechanical properties. A wide choice to control the emission and protect the luminaire.

Optic

The way the light is directed. Managing reflections and refractions to have most of light where is needed.

Emission

Optimising light output not only to achieve best performance but also comfort and wellness. Direct, undirect and Up&Down.

Gear

Control

On/off, dim light on request.

Endurance

Adapt lifespan to project needs even in hard conditions.

Emergency

Safety by lighting even when there is no electrical supply.

Sensors

Interaction in realtime between lighting and application environment.

Body

Size

Dimension adjusted to specific project.

Material

Sheet steel, aluminium, stainless steel, polycarbonate. Protection: IP, IK.

Acoustic material

Utilizing PET-based materials in acoustic luminaires reduces noise pollution and curbs sound wave reverberations and reflections, leading to heightened speech clarity and a tranquil auditory environment.

Finishing

Anodising, painting - with non-standard colours available in our offer, it's possible to choose any colour from the RAL palette, so it perfectly complements the character of the designed space.

Installation

Surface, recessed, suspended - it is also possible to adapt the design of the luminaires to various types of suspended ceilings used on the market, including ceilings with different module sizes.

Customised light

Matching the LED light sources to the needs of the project or investor can require luminaires equipped with non-standard light sources, for example with a very warm colour of 2700 K, or with Tunable White light sources.

Tunable White sources provide wide range of colour temperatures, usually from 2700 to 6500 K. Tunable White is able to imitate the outdoor natural light but also to create artificial atmospheres that invites to calm or boost activity if needed.

Luxcan Pro **N**

Adjust the luminaire's luminous flux to achieve the ideal light intensity and its uniformity. Select the luminaire with the appropriate light distribution to easily meet the required lighting standards.

Correct beam angle will help achieve the appropriate level of average illuminance and its uniformity by using luminaires with lower energy consumption. The right optical control provides comfort for optimal working spaces. This means savings for the investor when purchasing luminaires

as well as lowering the cost of operating the lighting. Correct optical system allows reducing glare, to meet the standard in offices (UGR <19). To achieve this, choose a product with Micro-PRM or a luminaire with an anti-glare louver.

Solutions tailored to any space

The full availability of product families with customisable optical systems enables a wide variety of light distribution and helps to comply with lighting standards and investor requirements. We are aware that in some projects standard solutions will not be enough that's why we are open to create new personalised solutions. Our experience helps us do it regardless of how challenging the project may seem. LUXIONA luminaires offer contains a variety

of customisable options that are perfect for lighting any space in modern offices. Choosing aesthetic and functional lighting was never that simple and creative. Starting from classic office rooms, open spaces, through conference rooms, chill-out zones, corridors and staircases to sanitary rooms or underground garages - there are endless possibilities to create and personalise.

1. narrow spot
15° up to 35°

2. medium spot
30° up to 60°

3. flood
60° up to 90°

4. wideflood
90° up to 120°

5. superflood
more than 120°

5. frosted

A variety of options

It is possible to personalise the product by choosing between different variations of diffusers and optical systems. Optics systems based on lenses - guarantee many different light distributions.

1. PLX - opal diffuser made of PMMA (polymethyl methacrylate). A smooth structure provides diffused light distribution and is often used in basic lighting fixtures.

2. Micro-PRM - opal diffuser made of PMMA (polymethyl methacrylate). A microprismatic structure provides a narrower distribution with more focused light. Luminaires equipped with such a diffuser are characterised by a lower glare, which makes them perfect for office lighting.

3. Tempered glass and matt tempered glass - most often used in clean luminaires. It increases the mechanical resistance of the luminaire and can be used alone (matt tempered glass) or in combination with Micro-PRM (tempered glass).

4. Laminated glass and matt laminated glass - made of two layers of glass secured with the foil between them, often used in the production of food.

5. PC (polycarbonate) - characterised by high mechanical resistance of the luminaire (IK10) and resistant to high temperatures.

6. LOW UGR louvers - characterised by lower glare factor, which makes them perfect for office lighting.

7. Transparent glass - protects the light sources and increases the degree of tightness of the luminaire. It does not affect the light distribution in such a significant way as matt glass does.

X-Line Pro Compact **N**

1. PLX

2. Micro-PRM

3. Tempered glass and matt tempered glass

4. Laminated glass and matt laminated glass

5. PC (polycarbonate)

6. LOW UGR louvers

7. Transparent glass

Customised gear

Smart lighting opens up a new range of possibilities for designers. It enhances comfort, adds drama and introduces flexibility by giving users the power to create the lighting conditions they need. By tuning the tone and brightness of light at different time of day it's easier to keep everyone focused and alert. Lighting system can change for every time of the day, or follow the sunrise and sunset on each day. The luminaires can be also equipped with an emergency module that provides the luminaire with the possibility of emergency operation.

Casambi

Casambi is a smart lighting system, that allows a mobile device to communicate directly with a luminaire and luminaires to communicate with each other. It uses a low-power radio communication technology that's built into every modern smartphone, laptop, and tablet. Which makes them ideal tools for controlling lighting, colour, or setting up scenes. It helps bring flexibility and personalisation to designs. By using sensors built into fittings it's also possible to respond to different circumstances and share the data in the cloud.

DALI

DALI is a protocol that enables efficient communication. It works between individual luminaires or groups of luminaires and a control system. It integrates and communicates with other system components such as motion detectors and light sensors, allowing for quick and easy reconfiguration. By use of intelligent LED lighting control, it's possible to save costs associated with lighting, by reducing light intensity in certain working areas which are not currently used or have sufficient daylight.

Artshape Three

Customised Body

Variety of shapes

Thanks to the offer of luminaires with diverse shapes, you can mix and match them into unique combinations, as in the case of the Mosaic family. By choosing architectural luminaires from the Artshape family it's possible to emphasise the character of the space thanks to various shapes. Luminaires in standard versions are available in three sizes, seven different geometric shapes and also in Edge and Full versions.

Customisable dimensions

The products from our offer can be personalised in terms of length, width or diameter, giving you limitless possibilities and allowing you to match the product perfectly to the space.

X-Line Pro Line Up&Down **N**

Modular systems

In modern office environments, the ability to quickly and efficiently adapt lighting systems to changes in layout and flexible office workflow is important for maintaining productivity and supporting change and improvement.

Rather than completely overhauling the entire lighting system, it is more practical and cost-effective to simply replace individual modules or add new ones. To achieve such flexibility, lighting systems must be designed with adaptability in mind, and use modular components and support rail systems that allow for easy repositioning of luminaires without the need for tools or complex installation procedures. Self-supporting rail systems, in particular, provide an excellent basis for lighting

in office spaces, as they offer maximum flexibility to quickly and smoothly react to changes in layout, caused by increased or reduced number of workstations, or by the changes in the purpose of how the space is used. Those changes mean that new tasks will be performed in the space and will require a new lighting layout. With modular systems this means that changes can be done flexibly without additional costs of interruptions in a workflow.

UMCS University, Lublin. Poland

Versatile Modular System

Modular system, that combines light engines, optics, frames, shutters, etc. giving endless combinations.

The system is complemented by different frames that allow the personalisation of the space:

1. Basic series, in square and circular format with customisable secondary reflector, made of plastic material.

2. Soft series, in square or circular format, both fixed and adjustable. Made of aluminium and steel. This series has a trimless circular version.

3. Pinhole series, made of aluminium, the installation frame is complemented with different accessories to generate various light effects.

X-Line Slight X-Line Pro 

Colours speak louder than words

With a variety of colours available in our offer designers gain real freedom in bringing to life their perfect projects.

The possibility of painting some of our luminaires according to the RAL palette is another step toward limitless creativity. While the white luminaire can be easily integrated with the ceiling or walls, sometimes it's

necessary to create a visual diversity between them. The vivid colour of a luminaire can become an eye-catching highlight or an integral part of any space.

Human Centric Lighting

Powerful tool for helping us stay focused and motivated during our work hours.

Our life cycles are closely linked to the cycles of natural light and darkness. However, we currently spend most of our time indoors, often being subjected to artificial lighting, which alters our natural biorhythms, and therefore our states of alertness and rest. To help us regain this balance we align four dimensions of light: direction, colour, intensity, and time of exposure to create lighting that supports people's well-being throughout the whole day of work.

Human Centric Lighting (HCL) allows us the purposeful, long-term light's impact on our activities and needs. It includes the biological, visual, and emotional impact of natural and artificial light on our organisms. The HCL approach focuses on supporting the body's circadian rhythm, a process that lasts approximately 24 hours.

An effective lighting solution taking into consideration the HCL approach uses the colour and the brightness of the light to imitate the changes natural light undergoes throughout the day. It allows us to define levels of visual comfort and create the correct relationship between lighting levels and colour temperature better suited to our activities, with the help of technologies such as Tunable White.

The effect is calming and relaxing in the evening and stimulating during the day. Raising the levels of melatonin introduces us to a state of relaxation and helps us improve our rest and sleep patterns. Through the suppression of melatonin, we help increase activation and alertness.

Dawidczyk & Partnerzy, Warsaw, Poland

Lighting your office together with LUXIONA

Providing adequate lighting in the workplace helps to maintain the required light levels and meets all the needs of employees including safety, visual and acoustic comfort.

A lighting solution, with the right colour temperature, intensity, and uniform illumination of the surface favours the symbiosis between the architectural space and its function and the needs of users. It provides the appropriate aesthetic impressions, affects the well-being and physical and mental comfort,

which is so important in the workplace. Office lighting should combine natural sunlight and artificial light. Working in front of a computer is a strain on the eyes. Proper illumination of the environment will minimize contrast, which if too high can cause discomfort while working.

Visual comfort

Our luminaires reflect perfectly the chosen space, complement its character and provide an optimal user experience. Well adapted lighting solution blends into the interior design, subtly enhancing the spaces' character and creating organic an inviting atmosphere.

Acoustic comfort

Acoustic comfort within office spaces is a critical determinant of productivity and well-being, as excessive noise pollution can impair concentration and communication. Implementing acoustic luminaires represents an efficacious strategy to mitigate such disturbances, effectively fostering a quieter and more conducive work environment.

Wellbeing & Productivity

Lighting affects our energy levels and contributes to physical and emotional well-being. Adequate lighting reduces the feeling of sleepiness in the first hours of work. By restoring the natural biorhythm in the workplace, it's possible to affect our productivity and creativity. Flexible light enhances motivation and improves the quality of work and time spent at the office.

LUXIONA

Aribau Sound Absorbent **N** **A**

N New product - Check availability

28 **A** Sound absorbent

New sound absorbent solutions

Sound absorbent luminaires: elevating comfort and productivity

Noise pollution, often being a result of open-plan layouts and increased collaborative work settings, stems from conversations, foot traffic, and ambient sounds, disrupting focus, hindering communication, and raising stress levels. This impairs productivity and creative thinking and can even lead to fatigue, burnout, and lower job satisfaction. To reduce these issues, sound absorbent luminaires provide a versatile solution

that combines lighting and sound absorption. Incorporating sound-absorbing materials, these fixtures dampen reverberations and sound wave propagation and enhance speech clarity on top of exceptional lighting parameters and efficiency. Moreover, LUXIONA luminaires offer aesthetic diversity, coming in various designs, sizes, and colours, seamlessly complementing office decor.

Tuset Sound Absorbent **N** **A**

Visual and acoustic comfort

Sound Absorbent Luminaires for elevated productivity and well-being

At LUXIONA, we pride ourselves on delivering lighting solutions that not only enhance aesthetics and lighting performance but also address the critical issue of noise pollution. Our latest solutions, sound-absorbent luminaires, represent a holistic approach to improving acoustic quality in various environments.

By incorporating advanced sound-absorbing materials in our luminaires and strategically combining them with other carefully selected technologies, we have created a seamless integration of lighting and acoustic comfort. This combination not only optimizes the visual aspect of spaces but also mitigates the negative effects of noise pollution.

The benefits of our sound-absorbent luminaires extend across diverse settings. In office environments, employees will experience heightened concentration levels and improved well-being, leading to increased productivity and job satisfaction. These effects positively impact talent retention. Also, restaurants and chill-areas will provide enhanced privacy and clarity during conversations, elevating their overall experience and ensuring that customers will come back.

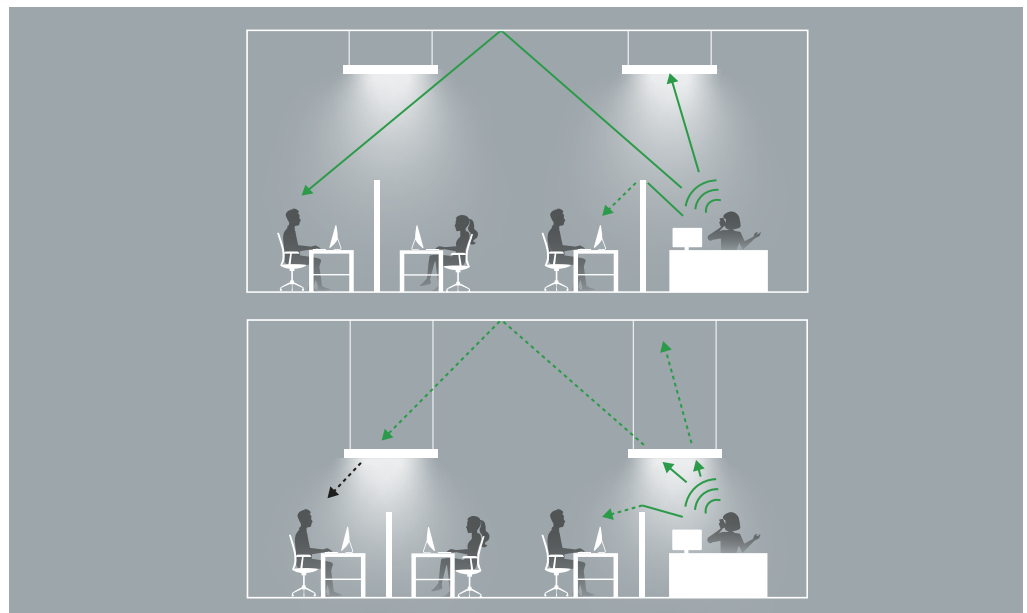

The integration of acoustic comfort into our best lighting solutions adds value for end-users and empowers designers of tertiary spaces with versatile tools. By offering lighting solutions that prioritize both visual and acoustic comfort, we ensure a harmonious and enjoyable environment for users across various applications.

Types of installation of acoustic solutions

In various rooms, depending on their acoustic properties, the materials used, and their intended use, there may be a demand for different types of installation of sound absorbent.

Specifically suspended units are utilized as solitary islands above workstations, it is recommended to install the lumianires as close to the workstations as possible. This positioning allows for more efficient absorption of sound waves generated within the immediate vicinity of the workstation. Moreover, the suspended units should adequately cover the work area.

Suspended units as a complement are recommended to divide the suspended units into smaller, evenly distributed units across the entire ceiling area. By employing smaller units spread across the ceiling, sound absorption is enhanced throughout the space, ensuring a more balanced and consistent reduction of ambient noise.

Rating according to ISO 11654: 1997 $a_w=0,85(H)$
 Weighted sound absorption coefficient Sound absorption class: Class B

LUXIONA's Acoustic Solutions

LUXIONA's latest offer comprises three distinct types of acoustic luminaire solutions, each tailored to address specific acoustic challenges in various workspaces. By offering three distinct acoustic luminaire solutions, LUXIONA caters to diverse workplace needs, providing professionals with efficient tools to optimize acoustic comfort and enhance overall employee well-being and productivity.

Standard colours:

Azure
Blue

Poppy

Customised colours:

Absorbent material: PET
Absorbent thickness: 9 mm,
12 mm (on request)

Waffle solutions between workstations

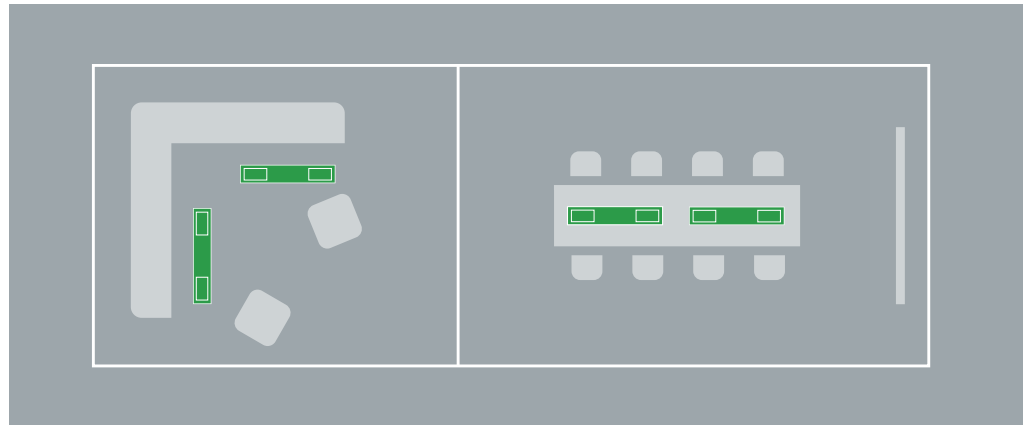

These acoustic luminaires are strategically positioned between workstations to effectively absorb and reduce sound reflections in open-plan office settings. By mitigating noise propagation, they create a more focused and private working environment by cutting the sound waves between benches. Waffle solutions are ideal for busy office areas with high interaction and communication demands, such as collaborative workspaces and team zones.

Horizontal suspended

The acoustic luminaire design incorporates sound-absorbing materials to minimize sound reflections from the ceiling and the floor. This solution is well-suited for conference rooms, meeting areas, and communal spaces where clear communication and effective audio conferencing are essential while preserving face to face live communication.

Island-type solutions for very noisy workplaces

Island-type acoustic luminaires are designed to create self-contained acoustic islands within exceptionally noisy work environments. These luminaires are effective in absorbing and diffusing sound waves, providing a serene and controlled acoustic space. They are recommended for big open spaces, meeting areas, food corners and other office spaces where noise levels can be overwhelming.

X-Line Slight Sound Absorbent **N** **A**
 X-Line Pro Sound Absorbent **N** **A**
 X-Line Slim Sound Absorbent **N** **A**

Waffle solutions between workstations

X-Line Family in acoustic versions: X-Line Pro, X-Line Slight, X-Line Slim combined with appropriate accessories.

LUXIONA waffle solutions between workstations are specifically designed as accessories for the family of luminaires: X-Line Pro, X-Line Slight, and X-Line Slim. Each accessory has been tailored to seamlessly integrate with the respective luminaire's profile,

ensuring a harmonious and effective combination of lighting and sound absorbent performance. Accessories to be fitted into X-Line family luminaires come in three standard colours: grey, red, blue and in customised versions upon request.

Tuset Sound Absorbent **N** **A**

Horizontal suspended

Tuset Sound Absorbent: Specially adapted versions for our Tuset family

Designed explicitly for adding sound absorbent properties to our top range of Tuset luminaires, among these adaptations, we offer the Tuset L-Down Led 5000 louver in three standard colours: Silver, Black, and Copper, with sound absorbent material in standard versions in grey, red and blue. By strategically integrating

sound-absorbing materials, these luminaires effectively minimize sound reflections from the ceiling and floor, creating a more acoustically pleasing environment. Our customers have the flexibility to choose from the standard colour options or the customised versions available upon request.

Aribau Sound Absorbent **N** **A**

Island-type solutions - Aribau system

Aribau is the new family of pendant luminaires that offer both standalone elegance and the versatility to create sophisticated like ceiling systems.

The luminaire body showcases impeccable craftsmanship with its black lacquered steel sheet construction. Embracing cutting-edge optics based on 7x1 and 4x4 louver systems, these luminaires provide a remarkable low glare illumination experience.

One of the most distinctive features of each luminaire is its lower bezel, skillfully crafted from acoustic material. These acoustic panels, manufactured from recycled PET felt, boast a harmonious blend of durability, lightweight, and a pleasing touch. With a wide array of colors available, including standard options like red, blue, and grey, these luminaires effortlessly complement any interior design. Beyond aesthetics, Aribau luminaires offer exceptional attributes, such as fire classifications B-21, d0, (EN-13501-1:2018) and superb acoustic properties, providing effective sound attenuation to create serene

environments. The square (596x596) and rectangular (1196x596 or 1196x596) luminaire covers open up a world of creative interior arrangements by joining them with a special accessory to create different shapes, allowing for a seamless integration into prestigious spaces like hotels, offices, banks, theaters, and cinemas.

Moreover, these luminaires serve as remarkable solutions to quell unwanted noises in various settings, including office cabins, conference rooms, and hotel suites. While Aribau luminaires play a significant role in enhancing acoustic environments, it is essential to remember that they synergize effectively with soundproofing systems anchored on PET acoustic panels.

Luxcan Pro N

A new product for different applications. Various optics, based on lenses, provide a wide range of beams from narrow, through the indirect beam, to the wide beam. The product is available in several colours, with the possibility of ordering a non-standard version.

Luxcan C

Combines the most advanced LED light sources with a variety of optics, which allows it to be used as an accent lighting in places that require distinction. Placing the power supply in the adapter allows for a smaller size of the luminaire.

Luxcan Mini

Small but strong. A classic luminaire with an optical system providing a perfect beam of light. Its power supply remains hidden by the rail, which decreases the luminaire's size, implementing the concept of a 'Vision Free System'!

Luxcan R

A cylindrical projector characterised by timeless design that seamlessly fits in any room. Luxcan R combines advanced LED sources with a variety of optics perfect to be used as an accent lighting in spaces that need a nice touch.

Lumbo

Balance and harmony. Spherical reflector designed for avoiding the visual disproportion. Combines Premium White LED sources with high colour rendering index. Thanks to the 'Total Orientation System' it rotates through 355° or tilts by 90°.

Beryl New K

A perfect union between minimalism, elegance and simple shape, that fully integrates with the architectural space. The luminaire has the ability to adjust the optics in two planes (in the vertical axis by 359° and to the left and right 15°).

Beryl New O

Small, yet powerful. Luminaire perfectly aligned with a space's aesthetics, by becoming an integral part of the architecture, with high efficiency and minimum usage. Excellent heat dissipation and large luminous flux for its size.

Beryl Surface O

Efficient lighting to light up spaces where architecture and aesthetics are key elements. The effect it leaves on the environment and its visibility for our comfort are hardly noticeable, giving room for great visual ease for its users.

Beryl Surface K

Downlight surface-mounted luminaire unrivaled in combining quality and energy efficiency. The luminaire has the ability to adjust the optics in two planes (in the vertical axis by 359° and to the left and right 15°).

Agat Slim

Versatile lighting, designed to manage light and to create different lighting solutions that focus on getting a comfortable view indoors. Luminaire made from powder-coated steel sheet, perfect for creating long lines.

Patos O

Architectural lighting that embodies an irreproachable style and high-quality lighting parameters. With a circular design and soft light it subtly enhances the space and makes it more warm and welcoming.

Patos Line

Simple and elegant. Patos is designed for exceptional spaces that need individual modern character. Body made of aluminium profile with a smooth or prismatic diffuser with exceptionally good light transmission coefficient and light diffusion parameters.

Snake V

Versatile lighting with a surprising twist. Luminaire combines comfortable lighting with creative appearance.

Versatile

Small size customisable downlights that come in different lighting sources and combinable structures that adjust to each environment. Creates minimalist general lighting systems.

Tuset N

New in our product portfolio. Suspended luminaire with a slender aluminium body and anti-glare louvers. Thanks to the possibility of making it in various colors and equipping it with a DIM DALI power supply it will meet the requirements of many various projects.

X-Line Pro N

A new, versatile product from the X-Line family, with a maximally simplified structure, without mounting plates or LED plates, distinguished by aluminium louvers with efficient LED sources.

X-Line Slim

Minimalism, effectiveness, and versatility perfectly balanced. Modern linear luminaire with maximum control of luminance. It adjusts to architectural space and gives freedom for design by creating unique long lines of light.

Mosaic

Freedom to create by designing patterns on modular ceilings. The combination of elements: the simple one, the curve, +-shaped, L-shaped, and T-shaped element provides possibilities for unique arrangement, which can be altered anytime.

Mosaic Sq

A stylish companion with efficient LED sources. Luminaire, made of steel sheet, with a universal square shape creates the right lighting effect, combined with satisfying standards and guaranteeing the highest level of efficiency.

Europanel

Inconspicuous yet effective. Luminaire with highly efficient LED sources for a wide range of applications. A perfect tool for designers that easily blends with its architectural surroundings.

Domino

Indispensable, equipped with highly efficient LED light sources. It uses an antiglare louvre which reduces glare and directs light precisely, providing perfect light distribution and uniformity as well as welcoming general lighting.

IK 04	SDCM 3	IP20 IP44	CRI >80
----------	-----------	--------------	------------

Agat Pos

Discreetly integrates into any architectural space making it recommended choice for various office areas. With efficient LED sources it provides optimal lighting distribution in space for the perfect, extensive illumination.

IK 04	SDCM 3	CRI >80	
----------	-----------	------------	--

Aruna

The modern fixture equipped with innovative optical design and high-efficiency LED light sources. It provides uniform and pleasant illumination, and its versatile installation options make it the perfect lighting solution for diverse office spaces.

IK 04	SDCM 3	CRI >80	
----------	-----------	------------	--

Agat Deco Smooth

Gentle and uniform with mellow light. Made of steel sheet luminaire integrates seamlessly with the overall interior architecture, bringing the depth of the space to life and providing a practical and lasting solutions.

IK 04	SDCM 3	CRI >90	
----------	-----------	------------	--

Patos O

Architectural lighting that embodies an irreproachable style and high-quality lighting parameters. With a circular design and soft light it subtly enhances the space and makes it more warm and welcoming.

IK 04	SDCM 3	IP 20	
----------	-----------	----------	--

Snake V

Versatile lighting with a surprising twist. Luminaire combines comfortable lighting with creative appearance.

X-Line Pro Sound Absorbent N A

A new, versatile product from the X-Line family, with a maximally simplified structure, without mounting plates or LED plates, distinguished by aluminium louvers with efficient LED sources. Version with sound absorbent accessories.

X-Line Slight Sound Absorbent N A

New luminaire with a classic and elegant line. An aluminium profile with a minimised width up to 34mm wide, and a diffuser recessed into the body and aesthetically flushed with the equipment. Version with sound absorbent accessories.

Tuset Sound Absorbent N A

Special acoustic version of suspended luminaire with a slender aluminium body and anti-glare louvers. Thanks to the possibility of making it in various colours and equipping it with a DIM DALI power supply it will meet the requirements of many various projects.

X-Line Slim Sound Absorbent N A

Minimalism, effectiveness, and versatility perfectly balanced. Modern linear luminaire with maximum control of luminance. Special Acoustic version with sound absorbent accessories.

Aribau Sound Absorbent N A

Versatile family of pendants, available as single units or as part of complex ceiling systems. With their low-glare louvers and a lower bezel made from acoustic PET felt, Aribau luminaires craft comfortable and tranquil environments in prestigious interiors.

X-Line Slight N

New luminaire with a classic and elegant line. An aluminium profile with a minimised width up to 34 mm wide, and a diffuser recessed into the body and aesthetically flushed with the equipment.

Artshape Round

Architectural luminaire in round design that allows flexible use, enhances the feeling of a bigger space and gives it a modern and welcoming feeling. Available in Full And Edge versions.

Artshape X

Monotony left behind. A modernistic luminaire tackles the traditional geometry of vertical and horizontal surfaces and produces refreshing lighting effects.

Artshape Oval

With the low profile and elegant appearance the luminaire perfectly meets the challenges of various applications from homogeneous illumination of horizontal spaces to emphasizing highlights such as reception or a meeting point.

Artshape Line

A straight forward way to beautify architectural projects. A luminaire with a geometrical design that allows creating comfortable atmospheres offering harmony, symmetry, and connection among spaces.

Flying Surface

A visionary eye-catcher. An extraordinary proposal that arose from French designer **Jean Nouvel** and Troll's alliance. A light surface gives the feeling of floating around in space and provides highly even and balanced lighting.

Outdoor lighting

Emergency lighting

Beryl New K

A perfect union between minimalism, elegance and simple shape, that fully integrates with the architectural space. The luminaire has the ability to adjust the optics in two planes (in the vertical axis by 359° and to the left and right 15°).

Beryl New O

Small, yet powerful. Luminaire perfectly aligned with a space's aesthetics, by becoming an integral part of the architecture, with high efficiency and minimum usage. Excellent heat dissipation and large luminous flux for its size.

Beryl Surface K

Downlight surface-mounted luminaire unrivaled in combining quality and energy efficiency. The luminaire has the ability to adjust the optics in two planes (in the vertical axis by 359° and to the left and right 15°).

Beryl Surface O

Efficient lighting to light up spaces where architecture and aesthetics are key elements. The effect it leaves on the environment and its visibility for our comfort are hardly noticeable, giving room for great visual ease for its users.

Versatile

Small size customisable downlights that come in different lighting sources and combinable structures that adjust to each environment. Creates minimalist general lighting systems.

Outdoor lighting

Emergency lighting

Kubik Pole L New N

Outdoor luminaire for assembling on a hardened surface equipped with the highly effective power saving LED sources of the newest generation. The system is designed and optimized for lighting streets, parks, gardens.

Kubik Pole T New N

Geometric T-shaped luminaire. Equipped with highly efficient, energy-saving LED sources with asymmetrical or symmetrical lenses, that provide uniform and functional lighting.

Kubik Pole 4D

Simple geometric form and resistance in all conditions. Luminaire for mounting on a hard surface, equipped with the modern LED sources Luminaire equipped with an optical system for various applications.

Kubik LED

Ideal for lighting selected outdoor spaces due to its elegant and simple design and its wide range of optical variants. Made in aluminium and powder paint to guarantee maximum resistance to weather conditions.

Tosca

Unobtrusive, elegant, and energy-saving. Designed for installation on a hardened surface, equipped with high-performance, energy-saving LED sources of the latest generation.

Filar

A minimalist design and simple form. Thanks to the combination of the base made of aluminium and the diffuser tube made of acrylic satin, the luminaire perfectly complements surroundings of architectural buildings.

Beryl Proof Wall

An eye-catching accent, cylindrical luminaire that is suitable for mounting on walls, equipped with LED sources with high luminous efficiency. Perfect for decorative or accent lighting of building facades.

Fasad

Highly effective luminaire resistant to weather conditions. It's best recommended for mounting on walls or top of solid substrates and is perfect accenting architectural objects.

Klover

Entrances and presentable areas

Corridors and stairways

Conference rooms, classic rooms and open spaces

Chill areas and meeting points

Complementary spaces

Outdoor lighting

Emergency lighting

Óptima

Range of emergency luminaires with a minimalist design and maximum functionality available as surface-mounted, recessed, or watertight luminaires. Óptima integrates into the space and meets the technical requirements.

K-Mini

Emergency luminaire designed to minimise the visual impact while meeting with the legal requirements for emergency lighting. Available with optics for anti-panic and evacuation lighting.

Klover

Efficiency and respect for the environment. Klover has been designed with the maximum use of energy in mind. Thanks to good performance and reduction of its battery we minimise the impact on the environment.

Brick

Stylised design with clean and minimalistic lines. Its small size and geometric features provide the necessary safety with as little impact as possible. Suitable for wall mounting horizontally or vertically.

Premier

Compact design, clean shapes and reduced form. All of that makes Premier able to adapt to the architectural and aesthetic needs of any surroundings with maximum technological benefits.

Óptima ST 2H P			1,65 - 5,63		
Óptima ST 3H P			1,65 - 5,63		

1H, 2H, 3H - autonomy, NP - operation mode (non maintained), P - operation mode (maintained), ST - type of emergency module (autotest)

K-Mini

Name	Luminaire luminous flux [lm]	Efficiency [lm/W]	Power of luminaire [W]	Colour temperature [K]	Dimensions [mm]
K-Mini 1H NP AP	From 120 to 390	-	-	5000	Ø40 x 23
K-Mini 1H NP EV					
K-Mini 1H NP AP					
K-Mini 1H NP EV					

1H - autonomy, NP - operation mode (non maintained), AP - optics for anti-panic and lighting, EV - optics for evacuation lighting

Klover

Name	Luminaire luminous flux [lm]	Efficiency [lm/W]	Power of luminaire [W]	Colour temperature [K]	Dimensions [mm]
Klover ST 1H NP	From 54 to 344	-	-	6500	119 x 262 x 38
Klover ST 1H P					

1H - autonomy, NP - operation mode (non maintained), P - operation mode (maintained), ST - type of emergency module (autotest)

Premier

Name	Luminaire luminous flux [lm]	Efficiency [lm/W]	Power of luminaire [W]	Colour temperature [K]	Dimensions [mm]
Premier ST 1H NP	From 60 to 500	-	1,01	5000	121 x 239 x 39
Premier ST 2H NP			1,01		
Premier ST 3H NP			1,01		
Premier ST 1H P			From 2 to 5,63		
Premier ST 2H P			2,58 & 3,59		
Premier ST 3H P			2		

1H, 2H, 3H - autonomy, NP - operation mode (non maintained), P - operation mode (maintained), ST - type of emergency module (autotest)

Brick

Name	Luminaire luminous flux [lm]	Efficiency [lm/W]	Power of luminaire [W]	Colour temperature [K]	Dimensions [mm]
Brick ST 1H NP	From 60 to 300	-	0,23 & 1,01	5000	45 x 202 x 45
Brick ST 2H NP			1,01		
Brick ST 3H NP			1,01		
Brick ST 1H P			From 1,21 to 2,51		
Brick ST 2H P			2 & 2,58		
Brick ST 3H P			2		

1H, 2H, 3H - autonomy, NP - operation mode (non maintained), P - operation mode (maintained), ST - type of emergency module (autotest)

LUXIONA worldwide

Commercial offices:

Spain, Poland, France, Italy, Germany

Logistics centre:

Spain, China

Production:

Poland / Spain (emergency)
